Volume 10 1969

Table of Contents

1 IUPAC Commission on the Nomenclature of Organic Chemistry (CNOC) and IUPAC-IUB Commission on Biochemical Nomenclature (CBN). The Nomenclature of Steroids. Revised Tentative Rules

20 A. S. Spirin: The Second Sir Hans Krebs Lecture. Informosomes

Nucleic Acids and Protein Synthesis — Biochemical Genetics — Morphogenesis

36 E. G. Richards: 5 S RNA. An Analysis of Possible Base Pairing Schemes

61 C. Saccone, M. N. Gadaleta, and R. Gallerani: RNA Synthesis in Isolated Rat Liver Mitochondria

96 R. D. Nolan and H. R. V. Arnstein: The Dissociation of Rabbit Reticulocyte Ribosomes into Subparticles Active in Protein Synthesis

312 B. Kadenbach: A Quantitative Study of the Biosynthesis of Cytochrome c

330 J. P. Reboud: Comportement du *N*-acétylphénylalanyl-tRNA dans un système acellulaire de Mammifère permettant la synthèse de polyphénylalanine

355 G. Schreiber, H.-M. Rotermund, H. Maeno, K. Weigand, and R. Lesch: The Proportion of the Incorporation of Leucine into Albumin to that into Total Protein in Rat Liver and Hepatoma Morris 5123 TC

362 R. Warocquier and K. Scherrer: RNA Metabolism in Mammalian Cells at Elevated Temperature

371 W. Ostertag and E. W. Smith: Hemoglobin-Lepore$_{\text{Baltimore}}$, a Third Type of a δβ Crossover (δ^{50}, β^{86})

450 I. Fedorcsák, A. T. Natarajan, and L. Ehrenberg: On the Extraction of Ribonucleic Acid with Template Activity from Barley Embryos Using Diethyl Pyrocarbonate as Nuclease Inhibitor

549 T. Igo-Kemenes and H. G. Zachau: On the Specificity of the Reduction of Transfer Ribonucleic Acids with Sodium Borohydride

561 A. Galizzi: The Coding Properties of Multiple tRNA for Valine and Leucine in Hemoglobin Synthesis

585 W. Neupert, W. Sebald, A. J. Schwab, A. Pfaller, and Th. Bücher: Puromycin Sensitivity of Ribosomal Label after Incorporation of ^{14}C-Labelled Amino Acids into Isolated Mitochondria from *Neurospora crassa*

589 W. Neupert, W. Sebald, A. J. Schwab, P. Massinger, and Th. Bücher: Incorporation *in vivo* of ^{14}C-Labelled Amino Acids into the Proteins of Mitochondrial Ribosomes from *Neurospora crassa* Sensitive to Cycloheximide and Insensitive to Chloramphenicol

Protein Chemistry — Enzymology — Physical Chemistry

43 E. Ohmann and F. Plhák: Reinigung und Eigenschaften von Phosphoenolpyruvat-Carboxylase aus *Euglena gracilis*

56 W. Schöpp, H. Sorger, H.-P. Kleber und H. Aurich: Kinetische Untersuchungen zum Reaktionsmechanismus der Carnitindehydrogenase aus *Pseudomonas aeruginosa*

102 X. Wilhelm et M. Champagne: Dissociation de la nucléoprotéine d'érythrocytes de poulets par les sels

110 L. Garby, G. Gerber, and C.-H. de Verdier: Binding of 2,3-Diphosphoglycerate and Adenosine Triphosphate to Human Haemoglobin A

116 P. A. Boulanger, P. Flamencourt, and G. Biserte: Isolation and Comparative Chemical Study of Structural Proteins of the Adenoviruses 2 and 5: Hexon and Fiber Antigens

132 Y. Michel-Briand: Étude des relations entre la structure d'un stéroïde et son effet inducteur sur le 3α-hydroxystéroïde: NAD oxydoréductase de *Pseudomonas testosteroni*

140 A. H. A. van den Oord, J. J. Wesdorp, A. F. van Dam, and J. A. Verheij: Occurrence and Nature of Equine and Bovine Myoglobin Dimers

146 J. P. G. Miller and D. J. Perkins: Model Experiments for the Study of Iron Transfer from Transferrin to Ferritin

152 H. Tuppy and H. Schenkel-Brunner: Formation of Blood-Group A Substance from H Substance by an α-*N*-Acetylgalactosaminyl Transferase. Partial Purification of the Enzyme from Hog Gastric Mucosa

158 R. Jaenicke and W. B. Gratzer: Cooperative and Non-Cooperative Conformational Effects of the Coenzyme on Yeast Glyceraldehyde-3-Phosphate Dehydrogenase

172 A. Brunner, A. Devillers-Mire, and H. de Robichon-Szulmajster: Regulation of Isoleucine-Valine Biosynthesis in *Saccharomyces cerevisiae*. Altered Threonine Deaminase in an is_1 Mutant Responding to Threonine

184 W. B. Gratzer: Association of Nucleic-Acid Bases in Aqueous Solution: a Solvent Partition Study

195 G. E. Schulz and T. E. Creighton: Preliminary X-Ray Diffraction Study of the Wild-Type and a Mutationally-Altered Tryptophan Synthetase α Subunit

213 J. Vanhumbeeck and P. Lurquin: Purification and some Properties of Leucyl-tRNA Synthetase from *Bacillus stearothermophilus*

238 P. R. Huber, R. Griesser, B. Prijs, and H. Sigel: Ternary Complexes in Solution. The Stability Increasing Effect of the Imidazole Group on the Formation of Mixed Cu^{2+} Complexes

249 B. Tveit and F. C. Störmer: The pH 6 Acetolactate-Forming Enzyme from *Aerobacter aerogenes*. Determination and Function of Thiol Groups

251 F. C. Störmer, Y. Solberg, and T. Hovig: The pH 6 Acetolactate-Forming Enzyme from *Aerobacter aerogenes*. Molecular Properties

261 K. G. Wagner: On the Interaction of Nucleotides with Basic Polyamino Acids. Cooperative Binding Behavior

274 E. Shechter: Circular Dichroism of Bovine Plasma Albumin—Dye Complexes

284 J. Witwicki and K. Zakrzewski: Sulfhydryl Groups in Human Ceruloplasmin

291 A. Rupprecht, R. Rigler, B. Forslind, and G. Swanbeck: Optical Properties of Oriented Dye-LiDNA Complexes Prepared with the Wet Spinning Method

324 R. Malkin, B. G. Malmström, and T. Vänngård: Spectroscopic Differentiation of the Electron-Accepting Sites in Fungal Laccase. Association of a Near Ultraviolet Band with a Two Electron-Accepting Unit

336 G. Lemaire, R. van Rapenbusch, C. Gros, and B. Labouesse: Beef Pancreas Tryptophanyl-tRNA Synthetase. Molecular Weight, Composition and Spectral Properties

377 M. Sumper, D. Oesterhelt, C. Riepertinger und F. Lynen: Die Synthese verschiedener Carbonsäuren durch den Multienzymkomplex der Fettsäuresynthese aus Hefe und die Erklärung ihrer Bildung

388 I. Cohen, Z. Bohak, A. de Vries, and E. Katchalski: Thrombosthenin M. Purification and Interaction with Thrombin

395 F. Bossa, G. Rotilio, P. Fasella, and B. G. Malmström: An Optical Rotatory Dispersion Investigation of Fungal Laccase

419 F. Fiedler, B. Müller, and E. Werle: The Inhibition of Porcine Pancreas Kallikrein by Di-Isopropyl-Fluorophosphate. Kinetics, Stoichiometry, and Nature of the Group Phosphorylated

439 D. G. Priest and J. R. Fisher: Substrate Activation with a Xanthine Oxidase Reaction. An Alternative to Dismutation as an Explanation in the Chicken Liver System

445 E. Werries, E. Wollek, A. Gottschalk, and E. Buddecke: Separation of *N*-Acetyl-α-Glucosaminidase and *N*-Acetyl-α-Galactosaminidase from Ox Spleen. Cleavage of the O-Glycosidic Linkage between Carbohydrate and Polypeptide in Ovine and Bovine Submaxillary Glycoprotein by *N*-Acetyl-α-Galactosaminidase

474 C. H. Reynolds and J. S. McKinley-McKee: Anion-Binding to Liver Alcohol Dehydrogenase, Studied by Rate of Alkylation

523 A. Pusztai and W. B. Watt: Fractionation and Characterization of Glycoproteins Containing Hydroxyproline from the Leaves of *Vicia faba*

533 C. Little and P. J. O'Brien: Mechanism of Peroxide-Inactivation of the Sulphydryl Enzyme Glyceraldehyde-3-Phosphate Dehydrogenase

557 H. Rüdiger and L. Jaenicke: On the Role of *S*-Adenosylmethionine in the Vitamin B_{12} Dependent Methionine Biosynthesis

Cellular Biochemistry and Metabolism

66 W. Boos: The Galactose Binding Protein and its Relationship to the β-Methylgalactoside Permease from *Escherichia coli*

74 M. Makinose: The Phosphorylation of the Membranal Protein of the Sarcoplasmic Vesicles during Active Calcium Transport

83 W. Duntze, D. Neumann, J. M. Gancedo, W. Atzpodien, and H. Holzer: Studies on the Regulation and Localization of the Glyoxylate Cycle Enzymes in *Saccharomyces cerevisiae*

188 L. A. Menahan and O. Wieland: The Role of Thyroid Function in the Metabolism of Perfused Rat Liver with Particular Reference to Gluconeogenesis

198 A. Bass, D. Brdiczka, P. Eyer, S. Hofer, and D. Pette: Metabolic Differentiation of Distinct Muscle Types at the Level of Enzymatic Organization

207 S. Rapoport, M. Müller und R. Knöfel: $^{14}CO_2$-Bildung aus [3-^{14}C]Serin in roten Blutzellen

219 D. Keppler and K. Decker: Studies on the Mechanism of Galactosamine Hepatitis: Accumulation of Galactosamine-1-Phosphate and its Inhibition of UDP-Glucose Pyrophosphorylase

226 J. B. Jackson and A. R. Crofts: Bromothymol Blue and Bromocresol Purple as Indicators of pH Changes in Chromatophores of *Rhodospirillum rubrum*

243 Heide Hörtnagl, H. Winkler, and H. Hörtnagl: The Subcellular Distribution of Lysophospholipase in Bovine Adrenal Medulla

302 J.-Å. Gustafsson, C. H. L. Shackleton, and J. Sjövall: Steroids in Newborns and Infants. C_{19} and C_{21} Steroids in Faeces from Infants

318 T. A. Scott, E. Bellion, and M. Mattey: The Conversion of *N*-Formyl-L-Aspartate into Nicotinic Acid by Extracts of *Clostridium butylicum*

345 M. A. G. Sillero, A. Sillero, and A. Sols: Enzymes Involved in Fructose Metabolism in Liver and the Glyceraldehyde Metabolic Crossroads

351 A. Sillero, M. A. G. Sillero, and A. Sols: Regulation of the Level of Key Enzymes of Glycolysis and Gluconeogenesis in Liver

399 C. I. Ragan and P. B. Garland: The Intra-Mitochondrial Localization of Flavoproteins Previously Assigned to the Respiratory Chain

426 V. Braun and K. Rehn: Chemical Characterization, Spatial Distribution and Function of a Lipoprotein (Murein-Lipoprotein) of the *E. coli* Cell Wall. The Specific Effect of Trypsin on the Membrane Structure

459 R. G. Thurman and R. Scholz: Mixed Function Oxidation in Perfused Rat Liver. The Effect of Aminopyrine on Oxygen Uptake

468 R. Brodersen and P. Bartels: Enzymatic Oxidation of Bilirubin

479 H. Pape, R. Schmid, H. Grisebach und H. Achenbach: Übertragung der intakten Methylgruppe des Methionins bei der Biosynthese der L-Mycarose

484 E. Pfaff, H. W. Heldt, and M. Klingenberg: Adenine Nucleotide Translocation of Mitochondria. Kinetics of the Adenine Nucleotide Exchange

494 H. W. Heldt and E. Pfaff: Adenine Nucleotide Translocation in Mitochondria. Quantitative Evaluation of the Correlation between the Phosphorylation of Endogenous and Exogenous ADP in Mitochondria

511 B. C. Goodwin: Synchronization of *Escherichia coli* in a Chemostat by Periodic Phosphate Feeding

515 B. C. Goodwin: Control Dynamics of β-Galactosidase in Relation to the Bacterial Cell Cycle

539 M. P. Liedtke und E. Ohmann: Eigenschaften und Regulation einer Phosphatase in *Euglena gracilis*, Synthese und Inaktivierung

569 B. Jollès-Bergeret: A New Sulfinic Amino Acid: Homohypotaurine (3-Aminopropanesulfinic Acid). Isolation, Determination and Chromatographic Behaviour Compared with Sulfinic and Sulfonic Derivatives of Cysteine and Homocysteine

Natural Products

90 H.-J. Knackmuss, G. Cosens, and M. P. Starr: The Soluble Blue Pigment, Indochrome, of *Arthrobacter polychromogenes*

165 T. Laatikainen and R. Vihko: Identification of $C_{19}O_2$ and $C_{21}O_2$Steroids in the Glucuronide Fraction of Human Bile

268 L. Nover and M. Luckner: On the Biosynthesis of Cyclopenin and Cyclopenol, Benzodiazepine Alkaloids from *Penicillium cyclopium* Westling

278 J. Zylber, E. Zissmann, J. Polonsky, E. Lederer et M. A. Merrien: Sur la biosynthèse de la piloquinone, o-phénanthrène-quinone produite par *Streptomyces pilosus*

411 E. Granström and B. Samuelsson: The Structure of the Main Urinary Metabolite of Prostaglandin $F_{2\alpha}$ in the Guinea Pig

580 C. Asselineau, H. Montrozier et J. C. Promé: Présence d'acides polyinsaturés dans une bactérie: isolement, à partir des lipides de *Mycobacterium phlei*, d'acide hexatriacontapentaène-4,8,12,16,20oïque et d'acides analogues

Immunochemistry

501 G. Schmidt, Barbara Jann, and K. Jann: Immunochemistry of R Lipopolysaccharides of *Escherichia coli*. Different Core Regions in the Lipopolysaccharides of O Group 8

574 E. Lisowska: The Degradation of M and N Blood Group Glycoproteins and Glycopeptides with Alkaline Borohydride
